## PROJECTS

---

**LinkHub v2.0 - Full-Stack Content Aggregator Platform** | [Live Demo](#) | [GitHub](#)

- Designed and developed a secure, multi-tenant RESTful API from scratch using **Python**, **Django**, and **Django REST Framework** with full CRUD functionality for user profiles and links.
- Engineered a **JWT-based authentication** system for user registration and login, implementing custom object-level permissions to ensure data privacy and ownership.
- Integrated cloud media storage using **AWS S3**, configuring IAM roles, bucket policies, and CORS for production file uploads of user-generated content.
- Built a dynamic, responsive frontend with vanilla **JavaScript**, **HTML5**, and **CSS3**, featuring a private user dashboard and themeable, slug-based public profile pages.
- Deployed the full-stack application to production, managing a **PostgreSQL** database on **Railway** and the static frontend on **Netlify** via a **CI/CD** pipeline with Git.

**FitTrackPro - AI-Powered Fitness Tracker** | [GitHub](#)

- Built a user-centric fitness dashboard with **Django**, allowing users to log data and track progress.
- Integrated Google's **MediaPipe** and **OpenCV** to perform real-time pose estimation from user-uploaded videos, automatically counting exercise repetitions.
- Engineered a data tracking module for users to log daily calorie intake and workouts, storing the data in an **SQLite** database.
- Implemented data visualization features using **Chart.js**, creating dynamic dashboards to help users track their fitness progress over time.
